

# Maine Standards' YES Program is the best way to meet your Calibration Verification and AMR requirements!

## How YES Works

The Maine Standards' YES Program creates a Hassle-Free Automatic Testing Schedule. Your calibration verification and AMR verification materials are shipped according to your schedule and your test menu. Reminders are emailed twice a year, on the same timeline as CAP, to alert you when testing is due. You can leave it to us to automatically customize, schedule and ship your products.

## Yearly Evaluation Subscription

### QUICK DATA TURNAROUND

Quick turnaround of data reduction means you will quickly be able to identify any possible testing issues—eliminating weeks of potentially inaccurate patient results.

### TECHNICAL SUPPORT

Guaranteed, same-day technical support responses within normal business hours.

### READY-TO-USE LINEARITY SETS

Liquid samples require no reconstitution. Simply add product to your sample cup and run in replicates.

### MULTIPLE PRODUCT CONFIGURATIONS

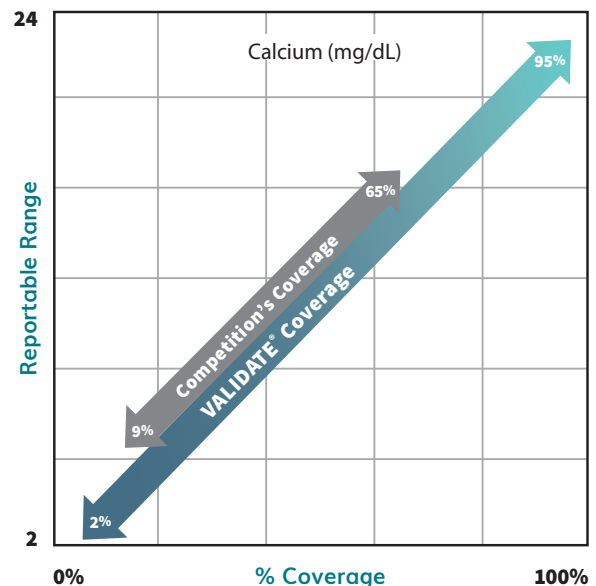

Maine Standards specifically formulates its VALIDATE® product line into specialized configurations with different analyte concentrations that challenge your analyzer's full reportable range.

**100% SATISFACTION GUARANTEED**

### SUPERIOR RANGE COVERAGE\*

with instrument specific configurations
